

2.3. Area F

WOLFGANG ZWICKEL

Area F was excavated in 1994 under the supervision of JÜRGEN ZANGENBERG. The area consists of two squares, AN 20 and AO 20, and is located next to area E on its southeastern side towards the lake.¹ All excavated structures are connected to the Iron Age I strata and therefore the area (including topsoil) will be published in another volume of this series.
